**Misrepresentation notice:**

Past performance is not a guide to future performance. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. For funds that use derivatives, their use may be beneficial, however, they also involve specific risks. Property-based pooled vehicles, such as the Fund, invest in real property, the value of which is generally a matter of a valuer's opinion. It may be difficult to deal in the shares of the Fund or to sell them at a reasonable price because the underlying property may not be readily saleable, thus creating liquidity risk.
